

Improving sustainability through best practice

What our users say

"We use CEEQUAL to define, shape and drive what sustainable design and delivery means on all our large infrastructure projects... It also helps us to keep the focus on sustainability throughout the project life cycle." **Helen Woolston, SHE Senior Manager Environment at Transport for London**

"CEEQUAL really helped engage and unify the collective team of client, contractor, designer, architect and supply chain towards collective sustainability goals." **Geraint Roland, Operations Environmental Manager at Costain**

"CEEQUAL is driving increased multidisciplinary focus to identify and implement innovation on major infrastructure projects in Qatar and the wider Middle East." **Harry Sealy, Environmental & Sustainability Manager at Jacobs**

"CEEQUAL helps encourage sustainable thinking across the whole multidisciplinary design team." **Steven Brown, Roads & Infrastructure Manager at Transport Scotland**

Choosing a scheme

CEEQUAL is available in two schemes; **Projects** and **Term Contracts**. These schemes can be utilised across the whole lifecycle of asset portfolios to assess new construction, refurbishment and maintenance/improvement activities as shown in the diagram below. CEEQUAL is also available in an **International** version to enable its use anywhere in the world.

CEEQUAL for Projects covers both new construction and major refurbishment activities. The assessment covers the Whole Project, but it can be scoped over different stages (Strategy, Design Construction) or a combination of stages.

CEEQUAL for Term Contracts covers maintenance and renewal activities, typically undertaken through multi-year contracts for a specific geographic or operational area.

Both schemes can also be implemented at a **Portfolio** or **Programme** Level for organisations who wish to assess and certify the sustainability performance of their whole asset portfolio or asset management programme.

Experience the benefits

Scores & Categories

CEEQUAL measures sustainable performance across a range of topics as shown below to give a holistic sustainability rating. Within each category credits are given for achieving requirements. These are then totalled to give an overall rating for the project.

Scheme rating:

Rating	Assessment Score (%)
Outstanding	≥90
Excellent	≥75
Very Good	≥60
Good	≥45
Pass	≥30

Sectors

Over £47bn of infrastructure assets under assessment
